## Maxcap Cleaner

---

- ◆ Innovative Design  
Dramatically Reduces Risk  
For Foreign Contaminates
- ◆ No Cleaners Required in the  
Finished Product Zone
- ◆ Testing Indicates 10% - 30%  
Capacity Increase
- ◆ Available in Standard and  
Custom Sizes
- ◆ FDA Compliant Material
- ◆ Patent Pending

The Maxcap Cleaner was designed with your high capacity and food safety needs in mind. Cleaner works on top of the screen, decreasing the potential for foreign contaminants in the finished product zone. Eliminate your need for backwire while maintaining a pitched pan and large side opening. Testing with the Maxcap Cleaner has shown increased capacity over other sieve/cleaner combinations. The Maxcap Cleaner can also be used to increase capacity in difficult sifting applications.
